Student Enrollment & Course Management System (SECMS)

User Story:

The Student Enrollment & Course Management System is a comprehensive Salesforce application designed to streamline and automate the academic enrollment operations of an educational institute. This system enables administrators, enrollment officers, and instructors to efficiently manage student records, course offerings, enrollments, instructor assignments, approval processes, payments, and reporting—all within a unified Salesforce environment.

1. INTRODUCTION

Project Overview :

This project aims to centralize all student, course, and enrollment-related data within a single Salesforce application to ensure easy data access, structured workflows, and accurate reporting. The system allows Enrollment Officers to manage student admissions, course registrations, and communication effectively, while instructors and administrators gain full transparency into course allocations and academic progress. The solution also enables automated instructor assignment, task creation, validation checks, and multi-level approval processes for enrollment management.

With Salesforce Flows, Approval Processes, Validation Rules, Reports, and Dashboards, the organization can ensure that all enrollment operations—from admission to course completion—are handled systematically and with continuous monitoring of key performance indicators such as enrollment volume, revenue, student status distribution, and pending approvals.

Purpose

Primary purpose of SECMS is to replace manual and fragmented enrollment processes with a scalable, automated, and secure Salesforce solution that ensures:

- Accurate student data management
- Structured enrollment workflows
- Automated approvals and validations
- Transparent reporting and monitoring

2. IDEATIONPHASE

Problem Statement (Customer Problem Statement Template)

PS	I am (Customer)	I’m trying to	But	Because	Which makes me feel
PS-1	Enrollment Officer	manage student enrollments efficiently	enrollment data is scattered	systems are manual and unintegrated	frustrated and error-prone
PS-2	Administrator	track enrollments and revenue	reporting is delayed	data is not centralized	uncertain in decision-ma king

2. IDEATION PHASE

2.1 Problem Statement (Customer Problem Statement Template)

2.2 Empathy Map Canvas

User Persona: Enrollment Officer

- **Think & Feel:** Concerned about double bookings and revenue loss
- **Hear:** Complaints from students and management
- **See:** Multiple spreadsheets and emails
- **Say & Do:** Rechecks data, follows up manually
- **Pain:** Duplicate entries, approval bottlenecks
- **Gain:** Automation, dashboards, faster processing

2. IDEATION PHASE

2.2 Empathy Map Canvas

2.3 Brainstorming & Idea Prioritization

Step1–Brainstormed Ideas

- Spreadsheet automation
- Standalone enrollment portal
- ERP integration
- Salesforce-based enrollment system

Step2– Grouping

- Manual solutions
- Semi-automated solutions
- Fully automated cloud solutions

Step3– Prioritization

Salesforce-based SECMS was selected due to **high feasibility** and **high impact**.

3. REQUIREMENT ANALYSIS PHASE

3.1 Customer Journey Map

Stages covered:

- Awareness & Registration
- Course Selection
- Enrollment Request
- Fee Payment
- Approval
- Instructor Assignment

- Reporting & Completion

3.2 Solution Requirements

Functional Requirements

FRNo	Epic	Description
FR-1	StudentManagement	Manage student records
FR-2	CourseManagement	Create and manage courses
FR-3	EnrollmentProcessing	Request, approve, reject enrollments

FR-4	InstructorAssignment	Auto-assigninstructors
FR-5	Reporting	Dashboardsandreports

Non-Functional Requirements

NFR-1: Usability

The system shall provide a simple, intuitive, and user-friendly interface that enables enrollment officers, administrators, instructors, and students to perform operations efficientlywithminimaltraining. Navigationshallbeorganizedthroughclearlylabeled tabs, dashboards, and forms to reduce user effort and errors.

Examples:

- Quick student registration form
- One-click enrollment approval
- Role-based dashboards

NFR-2:Security

The system shall ensure the confidentiality, integrity, and protection of student and institutional data through secure authentication, authorization, and access controls. Sensitive information such as personal data, enrollment history, and academic records shall only be accessible to authorized users.

Examples:

- Only admins can modify course details
- Instructors view only assigned students
- Students cannot access other student record

NFR-3:Reliability

Thesystemshalloperateconsistentlyandaccuratelywithoutfailuresduringenrollment processing, approvals, and reporting. Automation logic shall execute correctly to avoid duplicate or incorrect enrollments.

Examples:

- No duplicate course registration
- Accurate status updates after approvals
- Consistent report generation

NFR-4: Performance

The system shall provide fast response times for all operations to ensure smooth and uninterrupted user experience, especially during peak admission periods.

Examples:

- Quick dashboard refresh
- Fast search for student records
- No lag during bulk uploads

NFR-5: Scalability

The system shall support future growth in the number of students, courses, departments, and users without degradation in performance or functionality. It shall allow easy addition of new modules and features.

Examples:

- Add new departments without redesign
- Handle increased admissions annually
- Extend to mobile or portal integration

NFR-6: Availability

The system shall be continuously accessible to users during institutional working hours and must minimize downtime. The platform shall support high availability for academic operations.

Examples:

- 24/7 cloud access
- Reliable during peak admission season
- Automatic backup of student records

3.3 Data Flow Diagram

- User inputs student and enrollment data
- System validates and stores records
- Approval process routes data
- Reports and dashboards consume processed data.

The system processes enrollment requests, validates data, routes approvals, assigns instructors, and generates reports.

3.4 Technology Stack

Layer	Technology
UI	Salesforce Lightning

Logic	Salesforce Flows
Database	Salesforce Objects
Automation	Validation Rules, Approval Process
Reporting	Reports & Dashboards

4. PROJECTDESIGNPHASE

Problem–SolutionFit

SECMS directly addresses fragmented enrollment workflows by aligning user behavior, constraints, and automation using Salesforce-native capabilities.

4.2 Proposed Solution

Functional Requirements

Parameter	Description
Problem	Manual enrollment handling
Solution	Salesforce-based SECMS
Novelty	End-to-end automation
Social Impact	Improved student experience
Revenue Model	Institutional deployment
Scalability	Multi-department support

Solution Architecture

The architecture integrates Salesforce objects, automation flows, approval processes, dashboards, and security layers.

4.3 Solution Architecture

5. PROJECT PLANNING & SCHEDULING

Project Planning

- Agile methodology
- Epics→ Stories→ Story Points
- Sprint-based execution
- Velocity calculation used for estimation

Product Backlog, Sprint Schedule, and Estimation (4Marks)

Use the below template to create product backlog and sprint schedule

Sprint	Functional Requirement (Epic)	User Story Number	User Story/Task	Story Points	Priority	Team Members
Sprint-1	Developer Setup	USN-1	As a system administrator, I want to create a Salesforce developer account so that I can configure and deploy the Student Enrollment system..	1	High	Member1
Sprint-1	Data Modeling	USN-2	As an admin, I want to create Custom objects for Student,	3	High	Member2

Sprint	Functional Requirement (Epic)	User Story Number	User Story/Task	Story Points	Priority	Team Members
			Course, Enrollment ,and Instructor so that academic data can be stored and managed efficiently.			
Sprint-2	Data Modeling	USN-3	As a user, I want dedicated tabs for each object so that I can easily navigate between students, courses, enrollments, and instructors.	3	High	Member3
Sprint-2	Data Modeling	USN-4	As an admin, I want to create relevant fields such as student details, course information, and enrollment status so that complete records can be captured accurately.	5	High	Member4
Sprint-2	Data Modeling	USN-5	As an enrollment officer, I want a centralized Lightning App so that can access all academic operations from one interface.	3	High	Member4
Sprint-2	Data Modeling	USN-6	As an admin, I want to define relationships between students, courses, and enrollments so that the system can logically link and track academic activities.	5	Medium	Member1
Sprint-2	Data Modeling	USN-7	As a user, I want customized page layouts so that only relevant information is displayed, improving Clarity and ease of data entry.	5	High	Member2
Sprint-3	Automation	USN-8	As a system, I want to validate input data such as mandatory fields and enrollment limits so that incorrect or incomplete records are prevented.	3	High	Member4
Sprint-3	Automation	USN-9	As a system, I want automated flows to handle enrollment processing and notifications so that manual effort is reduced and Processes become faster.	3	High	Member4
Sprint-3	Automation	USN-10	As an administrator, I want an approval process for enrollment requests so that registrations are verified before confirmation.	5	High	Member1
Sprint-4	Security	USN-11	As an admin, I want to configure role-based security so that users can only access data relevant to their responsibilities.	5	High	Member2
Sprint-5	Reports	USN-12	As a manager, I want reports on student enrollments, course registrations, and instructor assignments so that I can monitor academic operations.	4	High	Member3
Sprint-6	Dashboards	USN-13	As a manager, I want visual Dashboards showing enrollment	4	Medium	Member4

Sprint	Functional Requirement (Epic)	User Story Number	User Story/Task	Story Points	Priority	Team Members
			Statistics and trends so that I can quickly analyze system performance.			

Project Tracker ,Velocity & Burndown Chart:(4Marks)

Sprint	Total Story Points	Duration	Sprint Start Date	Sprint End Date (Planned)	Story Points Completed (as on Planned End Date)	Sprint Release Date (Actual)
Sprint-1	20	6Days	24Oct2022	29Oct2022	20	29Oct2022
Sprint-2	20	6Days	31Oct2022	05Nov2022		
Sprint-3	20	6Days	07Nov2022	12Nov2022		
Sprint-4	20	6Days	14Nov2022	19Nov2022		

6. Project Development Phase:

Project Flow:

Milestone1: Salesforce Developer Account Creation

Milestone2: Custom Object Creation (Student, Course, Enrollment, Instructor)

Milestone 3: Tabs Creation

Milestone4: Lightning App Creation

Milestone 5: Fields Creation

Milestone 6: Create Relationships

Milestone7: Page Layout Customization

Milestone 8: Validation Rules

Milestone9: Flows(Automation)

Milestone 10: Approval Process

Milestone 11: Reports

Milestone 12: Dashboards

Milestone13: Security Setup

Milestone 14: Conclusion

What you'll learn

1. Real-time Salesforce project implementation
2. Designing custom objects and relationships
3. Creating page layouts & record types
4. Writing validation rules
5. Building automation with flows
6. Creating approval workflows
7. Developing reports & dashboards
8. Setting up security with profiles, permission sets, and sharing
9. End-to-end application testing

Milestone1-Salesforce:

Introduction:

Are you new to Salesforce? Not sure exactly what it is, or how to use it? Don't know where you should start on your learning journey? If you've answered yes to any of these questions, then you're in the right place. This module is for you.

Welcome to Salesforce! Salesforce is game-changing technology, with a host of productivity-boosting features, that will help you sell smarter and faster. As you work toward your badge for this module, we'll take you through these features and answer the question, "What is Salesforce, anyway?".

What Is Salesforce?

Salesforce is your customer success platform, designed to help you sell, service, market, analyze, and connect with your customers.

Salesforce has everything you need to run your business from anywhere. Using standard products and features, you can manage relationships with prospects and customers, collaborate and engage with employees and partners, and store your data securely in the cloud. So what does that really mean? Well, before Salesforce, your contacts, emails, follow-up tasks, and prospective deals might have been organized something like this:

<https://youtu.be/r9EX3IGde5k>

Activity1:CreatingDeveloperAccount:

Creating a developer org in salesforce.

Go to

<https://developer.salesforce.com/signup> On the sign up form, enter the following details:

fast and get hands-on with Agentforce and Data Cloud.

Sign up for your Developer Edition.

- ✓ Build apps fast with drag-and-drop tools
- ✓ Go further with Apex code
- ✓ Build AI agents with Agentforce
- ✓ Harmonize your data with Data Cloud
- ✓ Ground Agentforce with structured and unstructured data
- ✓ Integrate with anything using APIs

Sign up for your Developer Edition

A free Salesforce Platform environment with Agentforce and Data Cloud

First name	TAMILPAVAI ✓	Last name	J ✓
Job title	Student Enrollment & C... ✓	Company	kamban college of arts a... ✓
Country/region	India ✓	Work email	tamilpavaij14@gmail.com ✓

☒ I agree to the [Main Services Agreement – Developer Services](#) and [Salesforce Program Agreement](#)

Your free trial may be provisioned on or migrated to Hyperforce, Salesforce's public cloud infrastructure.

I acknowledge, as described in the Developer Documentation: (1) the Developer Edition includes autonomous and other generative AI features; and (2) Salesforce may limit use of those features and the org, and may terminate any org that has been inactive for 45 days.

We value your privacy. To learn more, visit our [Privacy Statement](#)

Sign me up

First name & Lastname

Email

Role: Developer

Company: College Name

County: India

Postal Code: pincode

Username: should be a combination of your name and company

This need not be an actual email id, you can give anything in the format:

username@organization.com

Click on sign me up after filling these.

Activity2: Account Activation:

1. Go to the inbox of the email that you used while signing up. Click on the verify account to activate your account. The email may take 5-10mins.

2. Click on Verify Account
3. Give a password and answer a security question and click on change password.

Change Your Password

Enter a new password for **lead@sb.oom**.
Make sure to include at least:

- ✓ 8 characters
- ✓ 1 letter
- ✓ 1 number

* New Password

Good

* Confirm New Password

Match

Security Question

▼ In what city were you born?

* Answer

Change Password

4. Then you will redirect to your salesforce setup page.

Milestone2–Objects:

Activity1:Creating Student Object:

The purpose of creating the Student custom object is to store and manage information about students such as their personal details, contact information, and enrollment status.

To create the Studentobject:

Go to the Setup page.

Click on Objec tManager.

Click on Create→ Custom Object.

Enter the details as below:

1. Label: Student
2. Plural Label: Students
3. Object Name: Student
4. Record Name:Student Name
5. Data Type: Text
6. Under Optional Features, select:
7. Allow Reports
8. Allow Activities(optional but recommended)
9. Track Field History(optional, if you want)
- 10.Under Search Status, select:
- 11.Allow Search
- 12.Click Save.

Field Name Instructor

Description

Specify the title that the related list will have in all of the layouts associated with the parent.

Related List Label **Enrollments**

Select the page layouts that should include this field. The field will be added as the last field in the first 2-column section of these page layouts. The field will not appear on any pages if you do not select a layout.

To change the location of this field on the page, you will need to customize the page layout. To change the values that appear, you will need to customize the Record Types.

Add Related List **Page Layout Name**
☒ Instructor Layout

☒ Append related list to users' existing personal customizations

Milestone5–ValidationRules:

Activity1:Student Email Domain Validation

Purpose:

To ensure students use only allowed institutional email addresses.

Steps:

Go to Setup → Object Manager → Student__c.

Click Validation Rules → New.

Rule Name: Student_Email_Domain_Validation.

Error Condition Formula:(examplefor@student.edu)

- NOT(CONTAINS(Email__c,"@student.edu"))

Error Message :Email must be a valid student institutional email. Error Location: Field → Email__c.

Click Save.

The screenshot shows the Salesforce 'Validation Rule Edit' interface for the 'Student' object. The left sidebar contains a navigation menu with items like 'Lightning Record Pages', 'Buttons, Links, and Actions', 'Compact Layouts', 'Field Sets', 'Object Limits', 'Record Types', 'Related Lookup Filters', 'Restriction Rules', 'Scoping Rules', 'Object Access', 'Triggers', 'Flow Triggers', and 'Validation Rules' (which is highlighted with a red box). The main content area is titled 'Validation Rule Edit' and includes a 'Save' button (highlighted with a red box). The 'Rule Name' field is set to 'Email_Must_Be_Student_Domain' and is highlighted with a red box. The 'Active' checkbox is checked. The 'Error Condition Formula' section shows the formula 'NOT (CONTAINS (Email__c, "@student.edu"))' (highlighted with a red box) and a 'Check Syntax' button (highlighted with a red box). A functions list on the right includes 'ABS', 'ACOS', 'ADDMONTHS', 'AND', 'ASCII', and 'ASIN'.

Error Message

Example: Discount percent cannot exceed 30%

This message will appear when Error Condition formula is **true**

Error Message

This error message can either appear at the top of the page or below a specific field on the page

Error Location ☐ Top of Page ☒ Field

Activity2:Fees Must Be Paid Before Approval

Purpose:

Prevent Enrollment from being approved until fees are paid.

Steps:

1. Go to Setup→Object Manager→Enrollment____c.
 2. Click Validation Rules→New.
 3. Rule Name: Fees_Must_Be_Paid_Before_Approval.
 4. Error Condition Formula:

AND(
 ISPICKVAL(Enrollment_Status__c,"Approved"),
 Fees_Paid__c = FALSE
)
 5. Error Message: Fees must be paid before approving an enrollment.
 6. Error Location: Top of Page(or field as needed).
- Click Save.

Steps:

1. Go to Setup→Approval Processes→select Enrollment__c.
2. Click Create New Approval Process→Use Standard Setup.
3. Process Name: Approval_Enrollment_Request.
4. Entry Criteria: Enrollment_Status__c="Requested".
5. Save and configure steps.

The screenshot shows the Salesforce Setup interface. In the left sidebar, the navigation menu is expanded to 'Process Automation', and 'Approval Processes' is highlighted. A search bar at the top left contains the text 'approval'. The main content area is titled 'Approval Processes' and includes a 'Manage Approval Processes For' dropdown menu set to 'Enrollment'. Below this, there are buttons for 'Create New Approval Process' (with a sub-menu showing 'Use Jump Start Wizard' and 'Use Standard Setup Wizard') and 'Reorder'. A yellow informational box provides guidance on creating approval processes.

Approval Process Edit Approval Enrollment Request

Step 1. Enter Name and Description

Enter a name and description for your new approval process.

Enter Name and Description

13. Activate the approval process.

Milestone7-Tabs

Activity1:Creating a Tab for the Student Object:

Goto Setup.

1. In the Quick Find box, type Tabs.
2. Under Custom Object Tabs, click New.
3. Select Student from the object List.

4. Choose a tab style (icon).
5. Click Next, assign it to all profiles, and then click Save.

The screenshot shows the Tableau Setup interface. On the left, the 'Setup' menu is open, and the 'Tabs' option under 'User Interface' is highlighted. The main panel is titled 'Edit Custom Object Tab Students'. It contains a table for 'Custom Object Tab Information' with the following data:

Tab Label	Object	Tab Style
Students	Student	Airplane

Below the table, there is a dropdown for 'Splash Page Custom Link' set to '--None--'. A text area for 'Description' is also present. At the bottom, there are 'Save' and 'Cancel' buttons.

Activity2: Creating Remaining Tabs

Now create the Tabs for there maining Objects, they are “Courses, Instructors, Enrollment”.

Follow the same steps as mentioned inActivity-1

Milestone8-TheLightningApp

Activity1:Creating the Lightning Application for the Project

Navigate to Setup.

Enter App Manager in the Quick Find search box.

Click New Lightning App.

Provide the app details:

App Name: Student Enrollment & Course Management

Developer Name auto-fills

Description: Optional, but can describe the purpose of the app

Click Next and choose the following settings:

App Branding(optional): Add logo or select color theme

Navigation Style: Choose Standard Navigation

Click Next and assign the app to specific profiles(e.g.,**Admin, Enrollment Officer, Instructor**).

Click Next to select the items(tabs) to be included in the app. Add:

1. Student
2. Course
3. Instructor
4. Enrollment
5. Reports
6. Dashboards
7. Home
8. Tasks

Click Next and review the app settings.

Finally, click Save & Finish.

App Details & Branding

Give your Lightning app a name and description. Upload an image and choose the highlight color for its navigation bar.

Choose the user profiles that can access this app.

Milestone9–Page Layouts and Record:

Activity1:Create Record Types for Enrollment:

Purpose:

To separate New Enrollment vs Re-Enrollment processes.

Steps:

1. Go to Setup→Object Manager→Enrollment____c.

2. Click Record Types→New.

3. For the first record type:

- Existing Record Type: Master
- Record Type Label: New Enrollment
- Enable for required profiles(Admin, Enrollment Officer).
- Select the default Page Layout→ Save& New.

4. For the second record type:

- Record Type Label: Re-Enrollment
- Enable for same profiles.
- Select the default Page Layout→Save.

Activity2:Separate Page Layo Createuts for Each Enrollment Record Type

Purpose:

To show different fields for New Enrollment vs Re-Enrollment.

Steps:

1. Enrollment__c object → click Page Layouts.
2. Click New to create a layout for New Enrollment:
 - Clone from existing Enrollment Layout → name it New Enrollment Layout → Save.
 - Keep fields relevant for first-time enrollment: Student, Course, Instructor, Enrollment Date, Status, Fees, etc.
 - Remove unnecessary re-enrollment fields if any.
 - Click Save.

The screenshot shows the Salesforce Page Layout Editor for the 'Enrollment' object. The left sidebar contains a navigation menu with 'Page Layouts' highlighted. The main area displays the 'Create New Page Layout' dialog, which includes a dropdown for 'Existing Page Layout' (set to 'Enrollment Layout') and a text field for 'Page Layout Name' (set to 'New Enrollment Layout'). Below the dialog, the 'Enrollment' page layout is shown with a table of fields and their values.

Field Name	Value
Enrollment Name	Sample Text
Student	Sample Text
Course	Sample Text
Instructor	Sample Text
Enrollment Date	12/22/2025
Enrollment Status	Sample Text
Fees Paid	✓
Comments	Sample Text
Course Fee	\$123.45

3. Again, click New to create Re-Enrollment Layout:

- Clone existing layout→name it Re-Enrollment Layout→Save.
- Include fields like previous Enrollment reference(if any), Re-Enrollment Reason, Status, Fees, etc.
- Click Save.

4. Page Layout Assignment→Edit Assignment.

5.For each profile and record type:

- New Enrollment→use New Enrollment Layout.

6.Re-Enrollment → use Re-Enrollment Layout.

Click Save.

Activity3:Enrollment R Addelated Lists to Parent Objects:

Purpose:

To see all Enrollments from Student, Course, and Instructor records.

a) Student→Enrollment Related List

Go to Setup → Object Manager → Student__c.

Click Page Layouts → open the main layout.

In the palette, select Related Lists.

Drag Enrollments related list on to the layout.

Customize columns if needed → Save.

b) Course→Enrollment Related List

Go to Object Manager → Course__c→Page Layouts.

Open layout → add Enrollments related list.

Save.

c) Instructor→EnrollmentRelatedList

Go to Object Manager → Instructor__c→PageLayouts.

Open layout → add Enrollments related list.

Save.

Milestone10–AutomationwithFlow

Activity1:Auto-Populate Enrollment Date (Record-TriggeredFlow)

Purpose:

Set Enrollment__Date__c to today when Enrollment is created.

Steps:

1. Go to Setup→Flows→New Flow.
2. Select Record-Triggered Flow→Create.
3. Object: Enrollment__c.
4. Trigger: A record is created.
5. Optimize for Actions and Related Records→Done.

Select Object

Select the object whose records trigger the flow when they're created, updated, or deleted.

- * Object

Enrollment

Configure Trigger

Trigger the Flow When:

- ☒ A record is created
- ☐ A record is updated
- ☐ A record is created or updated
- ☐ A record is deleted

Set Entry Conditions

Specify entry conditions to reduce the number of records that trigger the flow and the number of records that trigger the flow. This helps conserve your org's resources.

Condition Requirements

None

6. Add Update Records element:
 - Label: Set Enrollment Date.
 - Use record that triggered the flow.
 - Field: Enrollment Date__c→Value:\$Flow.CurrentDate.

7. Save as SetEnrollmentDate→Activate.

Activity2: Send Email When Enrollment Approved

Purpose:

When Enrollment_Status__c=Approved, send email, alert admin, and set Student to Active.

Steps(high level for document):

1. Create Email Template and Email Alert for student notification.

2. Go to Flows→New→Record-Triggered Flow.
3. Object: Enrollment__c, Trigger on update.
4. Condition: Enrollment_Status__c Equals "Approved".

 Configure Start

Enrollment

Configure Trigger

Trigger the Flow When:

☐ A record is created

☐ A record is updated

☒ A record is created or updated

☐ A record is deleted

Set Entry Conditions

Specify entry conditions to reduce the number of records that trigger the flow and the number of times the flow is executed. Minimizing unnecessary flow executions helps to conserve your org's resources.

If you create a flow that's triggered when a record is updated, we recommend first defining entry conditions. Then select the **Only when a record is updated to meet the condition requirements** option for When to Run the Flow for Updated Records.

9. Save as Enrollment Approved Action→Activate.

Activity3: Auto-Assign Instructor Based on Course Category

Purpose:

Assign Instructor automatically based on Course category.

Rules:

Technical → Instructor A

Language → Instructor B

Non-Technical→InstructorC

Steps:

1. Prepare Instructor__c records with codes(e.g., INSTR_A, INSTR_B, INSTR_C).
2. Create Record-Triggered Flow on Enrollment__c(created/updated).
3. Add Get Records to fetch related Course__c.
4. Add Decision element on Course__r.Category__c:
5. Technical/Language/Non-Technical outcomes.
6. For each outcome:
7. Get Instructor record(A/B/C)based on code or name.
8. Update Records: set Instructor__c=Get_Instructor_X.Id.
9. Save as Auto Assign_Instructor→Activate.

Activity4: Auto-Create Task for Follow-Up

Purpose:

When Enrollment is “Requested”, create a follow-up task for Admin.

Steps:

1. Create Record-Triggered Flow on Enrollment__c.
2. Trigger: Record created or updated; condition Enrollment_Status__c = "Requested".

 Configure Start ×

* Object

Configure Trigger

Trigger the Flow When:

10. Save as Create_Followup_Task→Activate.

Milestone11–Reports:

Activity1: Create “Students by Status” Report

1. Go to **Reports**→**New Report**.
2. Report Type : **Students**.
3. Group rows by **Status__c**.
4. Add columns as needed (Name, Email, Phone).
5. Save as **Students by Status**.

Activity2 :Create“Enrollments by Course” Report

- 1.New Report→Report Type: **Enrollments**.
- 2.Grouprows by **Course__r.Name**.
- 3.Show Record Count per course.
- 4.Save as **Enrollments by Course**

Activity3: Create “Pending Enrollment Approvals” Report

- 1.New Report→Enrollments report type.
- 2.Filter: `Enrollment_Status__c="Requested"`.
- 3.Addcolumns(Student, Course, Owner, Created Date).
- 4.Save as Pending Enrollment Approvals.

Activity4: Create “Revenue Report (Fees Paid)” Report

- 1.New Report→Enrollments report type.
- 2.Filter: `Fees_Paid__c=TRUE`.
- 3.Group by `Course__r.Name`.
- 4.Summarize `Course_Fee__c` or similar fee field.
- 5.Save as Revenue Report-Fees Paid.

Milestone12–Dashboards:

Activity1: Create “Student Managemet Dashboard”

Steps :

1. Go to **Dashboards**→**New Dashboard**.
2. Name: **Student Management Dashboard**.

3. Select folder→**Create**.
4. Select new Dashboard folder and Save.

Add components:

- **Donut Chart**→using **Students by Status** report.
- **Bar Chart**→using **Enrollments by Course** report.

- **Gauge**→ using **Revenue Report-Fees Paid**(sum of revenue field).
- **Table**→ using **Pending Enrollment Approvals** report.

4. Arrange components on canvas.

Click **Save**→ **Done**.

Milestone 13 – Security Setup

Activity1: Configure Profiles

):

1. Go to **Setup**→**Profiles**→**New**(or Clone **Profiles**

Required:

- **Admin**-Full access.
- **Enrollment Officer**-Create/Update Enrollments.
- **Instructor**-Read-only access to assigned Enrollments.

2.Steps (example for Enrollment Officer

fName: Enrollment Officer.

3.In Object Settings:

- 0 Enrollment__c:Read,Create,Edit.
- 0 Student__c / Course__c:Read(andEditif required).

4.Save.

Repeat similarly for **Instructor** profile with **Read-Only** on Enrollments

Activity2: Create Permission Sets

- 1.Go to **Set up→Permission Sets→New**.
- 2.Create **Custom Object Access**(additional access to project objects if needed).
- 3.Create **Dashboard Editor**(Create/Customize Reports& Dashboards permissions).
- 4.Assign to relevant users.

Activity3: Configure Sharing & OWD

Steps:

- 1.Go to **Setup→Sharing Settings**.
- 2.Set **Organization-Wide Defaults**:

- 0 **Students (Student__c)** :Public Read/Write.
- 0 **Courses (Course__c)** :Public Read/Write.
- 0 **Enrollments (Enrollment)__c** :Private.

3. Save.

For Instructor access to assigned Enrollments, optionally:

- Add a **User lookup** on Enrollment (Instructor User).
- Use a simple **Record-Triggered Flow** to set **OwnerId= Instructor User** so they can see only their own records.

7. FUNCTIONAL & PERFORMANCE TESTING

During the testing phase, screenshots were captured from the Salesforce user interface to verify the proper functioning of all implemented features of the Student Enrollment & Course Management System (SECMS). These include student, course, instructor, and enrollment record creation; validation rule checks for mandatory fields, eligibility, and enrollment constraints; verification of record type behavior for different course categories; flow execution for automated enrollment approvals and seat availability checks; and Apex trigger functionality to ensure automatic confirmation and record updates. Additionally, screenshots of generated reports and dashboards were documented to validate accurate data visualization, enrollment tracking, and performance monitoring. Submit the Screenshots while testing.

8. ADVANTAGES & DISADVANTAGES

Advantages

- Centralized data
- Automated workflows
- Real-time reporting

Disadvantages

- Salesforce dependency
- Requires initial configuration effort

FINAL OUTPUT:

9. Conclusion:

The Salesforce Student Enrollment & Course Management System successfully streamlines the entire student academic lifecycle—from student registration and course creation to enrollment management, instructor assignment, approvals, revenue tracking, and reporting. By leveraging Salesforce’s automation tools such as validation rules, flows, approval processes, and dashboards, the system improves data accuracy, operational efficiency, and decision-making. This project demonstrates how Salesforce can transform manual academic processes into a scalable, reliable, and user-friendly digital solution.
